## OH, IS THAT A FOLD?

THE PERILS OF BUYING RAW...

By Joseph M. Bissell

When it comes to procuring notes, there are probably not many worse feelings in the pit of your stomach than when you find out a note you've purchased either has a fold or a pressed out fold. The instantaneous sensation of realizing the value of that note in your hand is probably worth around half of what you just paid, coupled with the cognizance of a low probability for a refund – equals the summation of a bad day. It's not what the hobby is supposed to be about, I know. My job consists of a daily routine of shipping notes back to collectors and dealers that will be opening their boxes (like kids opening Christmas presents) and ruffling through the papers to see how their notes graded. It gives me great joy to send someone a note back in a "higher than expected" grade; but I know the feeling of finding the opposite. But you can do something about it! First, I must say (even though this loses our grading company money) try to ONLY purchase graded notes! Dealers have the sometimes, agonizing job, of having to sort through hundreds and sometimes thousands of notes each year to locate true Uncirculated quality notes for their customers. They have developed not only their skills, but also instincts

## CGC'S NEW SMALL SIZE HOLDERS ARE HERE!

In response to a very large demand CGC (Currency Grading & Certification, Inc.) has designed, engineered and contrived a new **small size holder**. This new holder was intended for encapsulating small size U.S. Notes, and also will be utilized for encapsulating small size World Paper Notes, Fractional Notes and Military Payment Certificates. The existing Large size holders will remain in place to house the Large U.S. Paper Money, and the Large size World Bank notes, as well as Confederate and Obsoletes.

The new small size holder will have the same thickness of its existing Large size counterpart holder, same interlocking stacking mechanism, and the same beautifully mirrored finishes on the lens. The overall dimensions will however be reduced. The height will now be reduced approximately a 1/2" and the width will be reduced 1 1/2" or more.

Also, CGC has dressed up the grading tabs for the new small size holders. The new tabs will have raised thermo black inks on the front of the tabs. The Gold foiling will be wider (more prominent) and in a larger open face font. Just these couple of small changes really dressed up the overall appearance of the holders.

## New Paper Money Albums!

CGC has received a plethora of calls and emails in regards to securing new Paper Money Albums that

**(602) 440-0442 Website: GRADEDCURRENCY.COM**

**Joe Bissell (Emails to: sales@gradedcurrency.com)**

of what their looking for and what to watch out for. I have collectors ask me all the time, "Joe, how do I learn more about grading notes properly (and I'm going to give you some tips in a moment)? My response is quite serious, "It can cost you quite a bit of your retirement fund learning. It can take years to hone certain skills to the point of being able to catch say 98% of all problem notes. Even after years, it sure helps to have a second & third opinion available Also, each note type has a vast pool of idiosyncrasies to learn.

I'm writing this article in response to a very high demand from collectors and subscribers to hopefully assist in the learning curve or possibly add something to your existing knowledge base. Buying **raw notes** can be a blast! On the flip side of the coin (pun intended) of the above perils, finding a raw note that you just bought for CU money, which turns out to be a Gem 65 or better is quite a thrill to say the least. It's partly the money, but it's also the validation of your skills. Ok, let's get started on those tips I promised:

**Lighting** - if your buying a note at a show, you might as well be in a dark room, ha-ha. Buying at an auction is pretty similar. I'm still trying to convince myself that people aren't doing this on purpose but I'm having trouble doing so. Go out and buy yourself a nice Halogen light, preferably with two settings (low and high), try to get one were the high setting is around 150 watts. I'll come back to what to do with this new tool in a few paragraphs.

**Population Reports** – Arm yourself with knowledge, this publication does provide the rarity factors of almost every Friedberg number and its related CU numbers, but you really need a Population report, which enables you to pull up a note

will hold the new size holders, and we're glad to say – "We did it!" Each album for the Large size notes holds one note to a page (smaller album) and each album holds a total of 8 to 10 pages (notes). The plastic sleeves are expanded so the plastic CGC holders fit very comfortably into each sleeve. There is also a Sleeve Cover which houses the entire album. The measurements of the new album are 10 3/4" tall by 8 3/4" wide and only 3 1/2" thick. You can see an image in this publication on page 4 (although it is very unclear, new photo's will be taken and published). For the new small size holders the album sizes may vary to hold two notes on each page. CGC is working on this project now. The albums are black in color with photo's of currency (coins) on the front, and they look great on credenzas and on book shelves. The price is \$175 plus s & h, not cheap we know, but the albums are very nice and well put together. If you interested in procuring one just send an email at: [CGC@CurrencyGradingCertification.com](mailto:CGC@CurrencyGradingCertification.com) or call at (602) 494-4758. Thanks!

**Int er est ing HISTORICAL FACTS**

Which sitting American President was arrested?

President Ulysses S. Grant was arrested for driving his horse-drawn carriage too fast and fined \$20.

Which President was expelled from College after only ONE year? James Buchanan in his freshman year at Dickinson College, but convinced officials to take him back.

**"PRICING, GRADING & POPULATION SUMMARY"**

This is a "Retail Publication," and is designed to reflect current market prices. These **prices** are procured from many sources, including: Dealers, Internet auctions, previous auction houses "prices realized," striving to reflect current market prices. If the Note Type contains a range of Fr.#'s, then the listed price reflects the most common Fr.#. This publication is in NO way instructing or suggesting for its readers to purchase at these levels. **Grading** ranges from Very Good (MS 8) to Premium Gem (MS 68). The listed prices were gathered from both professionally graded and independently graded "sold" notes. We did denote the observation that prof. graded notes generally sold for higher prices than independently graded notes. A **Population Summary** column is listed for ea. Note Type, many times with a range of Fr.#'s. Example: Fr.#100-102 (1880 \$10 Legal Tender) shows 24-6-38 in the Population column-meaning there are 24 notes in **CU & up** for Fr.#100, 6 notes (in CU & up) for Fr.#101 & 38 notes (in CU & up) for Fr.#102. If you see +++ there are likely more out there than reported.

**Granted Permission for the Friedberg numbering system (licensed) has been authorized by the Coin & Currency Institute, Inc.**

## **VERY IMPORTANT!**

**All Pricing Spreadsheets are  
reflective of C.G.C.  
Product only!**

These prices are the result of prices realized from sales of **C.G.C.** product, **NOT** raw notes and **NOT** notes in other slabbed holders!

You can NOT compare (realistically) C.G.C. prices realized with other notes (raw or graded by other companies) with similar expectations.

### **Recent EXAMPLES:**

CGC –65 Bison sold for **\$5.5k**, competitors 65 offered at **\$3.3k**  
CGC –66 Bison sold for **\$12.5k**, competitors 65 offered at **\$6.5k**  
CGC – 65 \$1 Ed (fr.224) sold for **\$3.5k**, competitors 65 sold **\$2.2k**  
CGC – 65 Chief (same fr.#) sold **\$4.3k**, competitors 65 sold **\$1.8k**  
CGC – 65 \$500 '34a sold **\$4.2k**, competitors 65 sold for **\$2.4k**  
CGC – 65 \$1,000 '34a sold for **\$9.5k** (ebay) competitors 65 **\$3.5k**  
CGC – 65 1168 \$10 GC sold **\$3.5k**, competitors 65 sold for **\$1.8k**  
CGC – 65 \$10 '28 Gold sold **\$1.9k**, competitors 65 sold for **\$1k**

(\*examples go on endlessly, the point is not all grading services realize equal values (as in the coin industry), and figures should not used for raw or other slabbed product).

< DEMAND NOTES >

Table with columns: Date & Denomination, Freiberg Numbers, MS 8 VG, MS 12 & 15 FINE, MS 20-25-30-35 VF, MS 40 & 45 XF, MS 50-53-55-58 AU, MS 60-62 CU, MS 63-64 CH CU, MS 65 \*GEM\*, MS 66 SUPERB GEM, MS 67 ULTRA GEM, MS 68 Premium GEM, POPULATION CU & UP

# Let's Talk

## **Oh, Is that a Fold? (cont. from pg. 2)**

Allowing you to see: **1.)** if either a note has been previously graded (for example it was submitted and graded out a ChCu 64) and someone has cut the note out of a holder and is representing the note as a Gem. This is a very popular past time for dishonest people, be very careful of these guys-they love to list them on the internet. **2.)** if a note may have been submitted and was returned as “body bagged” or as CGC refers to NG (No Grade), this report will alert you to notes that have been submitted that have been “Processed.” Many rare notes have been “worked” had folds pressed out, bleached, closed pinholes, ink spots removed, tears repaired (professionally and unprofessionally). **3.)** Most importantly these Population reports will allow you to view the “Rarity” of a particular Fr.#, how many are listed in each and every grade, if there are CU runs in surrounding serial #'s **4.)** A note (already graded) submitted in for a cross-over request (to have the other service grade it) reflecting whether or not the note made the cross over in an equal grade. You can get these **Population reports** (which are updated quarterly) by calling **(602) 493-4758** or visit the grading company's website to learn more at **CurrencyGradingCertification.com**

**Reputable Dealers** - A reputable dealer is someone who will allow you to return a note if it's represented as a certain grade and it's about as far away as Kenya is from your house, ha. Typical example, the plastic sleeve the note is in shows “Gem” and it has a fold (or maybe two). A majority of dealers have a serious problem returning the note, honestly, I'm baffled at this. There are still many dealers who will give you a refund, you need to locate these dealers and build relationships with them! Building a long-term relationship with a dealer is also a great way to procure **key notes** before they put them in their cases. Finding a good honest dealer is so important, one that is accountable and really cares about his customers. Yes, they're out there-please find one.

**Internet Sales** – If you're buying raw notes over the internet you probably need psychiatric care, ha. I remember when I purchased a very expensive lot over the internet and I received the notes, and every note was processed “pressed” and “re-embossed” Ouch!!! Not only would the seller not refund me my money (even after I offered to give up a grand) he taunted me and explained to me how he lined his pockets on my money, yep, a real sweetheart! The internet listing company (of course you know who that is) had about as much interest in helping me as I do collecting bottle caps. Try to buy **ONLY** Graded notes over the net, please! Whether buying over the internet or at a dealers table try to use a Charge Card so you can dispute the charge.

**Start with Inexpensive notes** – Don't buy a raw note for \$3,000, you wouldn't buy a raw coin for a large sum of money, start small. Make comments on paper before you submit a note, describe the note, lists its problems, flaws and positive characteristics and then assign an overall grade. Submit the note, and when you get it back compare it to what you described and the learning process begins, which is the most fun of all! With each note you submit, if you do it properly, you'll learn something valuable, this can be a very enjoyable part of the hobby.

**No, I didn't forget to come back and discuss lighting & general grading tips** – here's what you do, put the halogen setting on low and hold the note up and away from the light and slowly bring the note into the light (almost so half the note is in the shadow and half the note is entering in the light). You'll be looking for paper disturbances (not just handling) predominately vertical center folds. Sometimes you'll see a shiny line (pressed out fold), check the embossing (enter the note into the light as mentioned above) with the back of the note on top, don't just look at the serial #'s but also the spikes on the seal. Smell the note you're checking for a bleach odor, you'll know it when you smell it. Hold the note up against the light on high wattage and look for pinholes and corner tip bends/folds. Check the notes overall centering: top to bottom and left to right on front and back.

**Be suspicious & don't be over confident** – You'll encounter people who tell you they don't believe in slabbed or graded notes (these same people have slabbed/graded coins in their case – enough said!), be suspicious. If they say they like to feel and examine a note then why do they buy slabbed coins they can't feel? It's generally because they don't want you to send a note in to be graded and then find out what you just bought and try to return it. Don't be over confident on your grading abilities, it is a long time learned art, try to get a second or third opinion. I hope this article has helped answered some of your questions you've been submitting. Most importantly, this is supposed to be a fun hobby, hopefully this info. will help you enjoy it a little more!
