As the Fun show approaches I was thinking of something Art Kagin shared with me at the last Fun show (where I took this picture).

**"FUN Show Jan 2004"
A Numismatic Legend!**

I asked him, "Art, how do you pay more for the exact same items you just sold?" I went on (before letting him answer) to compliment him and tell him that most guys get "squeezed out" of the business – I see it every year at auctions. This is because they buy an item for \$2,000 sell it for \$3,000 and then they have to pay \$3,500 to buy another one (same condition, etc...) and they cannot get themselves to do it and fall behind the market and consequently end up

never seems to go down, just keeps going up up up. Well, here's my take on where we're headed, really don't think it takes a genius to see what's coming and why.

I've heard from many coin dealers (some of the most successful in the business) that the coin market is a little off what it was earlier in the year, this naturally gets the juices flowing in figuring out how to keep sales up. Now, when two coin grading co's decided to get into the paper money grading business it certainly filled the bill for new ideas when it comes to coin dealers making "new" money. Since many coin dealers are well familiarized with individuals at the these grading co's they decided to try their hand at paper money.

Well.....when you put a: Bison, Chief, Rainbow, Gold Cert, Porthole, Poker Chip note, or \$10,000 bills in your case, magic occurs....especially when you have these gorgeous pieces next to dull beat up rare coins, haaaa. Sales become slanted real fast! Once coin dealers started displaying paper money they found out real fast how quickly it sells and the true meaning of RARE! I'm sure they enjoy the much higher profit margins as well!

So.....off they went to replace the notes they just sold, but – like Santa in the chimney – They got stuck!!!

(Continued on Page 12)

withering away out of the business, sort of a slow & sad disappearance of notes in their cases.

He replied, "**Well.... If your not willing to pay to buy material at whatever the market is at, then you have nothing to sell and your out of business!**" So well put, straight forward and simply put – and so true! I'm really glad I took this picture of Art at his last Fun show 2004, you can see his smile coming through, doing what he truly enjoyed for his entire life. I'll really miss sharing my passion with him- for so many hours that Judy was constantly telling me, "Ok, Joe, I have to go, you can sit and talk to Daddy as long as you want," which in many cases was 3+hrs. at a time. Thanks Art for the history lessons and thanks Judy and Don for taking care of him and making sure he got to the shows all those years.....

Will there be any RAW notes left?

I became aware last night that there is yet another grading co. that just opened this month, that makes 8 or 9 I believe, with more sure to follow. This co. is based on the 100 point system. One thing seems to be certain ... the era of raw notes may soon become history. Bourse floors and auctions are being overrun with certified notes (more to come).

"PRICING, GRADING & POPULATION SUMMARY"

This is a "Retail Publication," and is designed to reflect current market prices. These prices are procured from many sources, including: Dealers, Internet auctions, previous auction houses "prices realized," striving to reflect current market prices. If the Note Type contains a range of Fr.#'s, then the listed price reflects the most common Fr.#. This publication is in NO way instructing or suggesting for its readers to purchase at these levels. **Grading** ranges from Very Good (MS 8) to Premium Gem (MS 68). The listed prices were gathered from both professionally graded and independently graded "sold" notes. We did denote the observation that prof. graded notes generally sold for higher prices than independently graded notes. A **Population Summary** column is listed for ea. Note Type, many times with a range of Fr.#'s. Example: Fr.#100-102 (1880 \$10 Legal Tender) shows 24-6-38 in the Population column-meaning there are 24 notes in **CU & up** for Fr.#100, 6 notes (in CU & up) for Fr.#101 & 38 notes (in CU & up) for Fr.#102. If you see +++ there are likely more out there than reported.

Let's Talk

HoHoHo... Here we Go! "The Coin Dealers are here!"

"and so are higher prices!"

Now why haven't coin dealers done this before you might ask..... After all, if their profit margins are so much higher and the inventory moves out so fast, why not? Simple answer – there are about 10,000 or 100,000 coin dealers in this Country trying to make a living and only about 68,000 large size notes (or about 50,000 when you take out Black Eagles and 1923 silvers), so you can see it's pretty hard for dealers making a living trying to sell things they don't have.

So what's changed? Well, there certainly aren't more notes available, so why now, why would coin dealers bother working harder trying to find and learn paper money? Three good reasons:

Coin market has been a little sluggish
Coin dealers have existing relationships with "those" grading co's
BIG PROFITS!!!

This is ALL good!!! Many paper money dealers are upset by this, they shouldn't be, they should feel great, these new paper money dealers (historically 100% coin dealers) have brought in so many new collectors. Remember, they are NOW displaying paper money in their cases more than ever before, what does that do for everyone? Raises awareness! We all know Paper Money is so much RARER than coins, it's certainly MORE aesthetically beautiful, and it costs so much less than coins. The ONLY reason paper cost less and has a smaller collector base is because of LOW awareness. This is because 10,000 to 100,000 coin dealers cannot all make money selling paper – it's too difficult to get (just much rarer than coins).

And The CHASE begins..... So, now that coin dealers have experimented with selling paper on a grander scale (certified paper) they see how lucrative and profitable it is, guess what? You got it, they're coming back for more (oh NO! they cannot reload like they do in coins), haaaaa. What does/will this do to prices? Now, let's add the last variable – **Collector's disdain selling their collection of paper money!** They'd (collectors) would rather sell their house before their collection....it's taken them 3, 5 or 10 years to get the notes they've wanted, they just hate to sell. This being true, what does that do to prices? Dealers cannot buy back from collectors!

In the last 5 years, especially the last 24 months, I've watched material dry up to the point that it's getting seriously close to collectors having to settle for notes in Fine condition. We've especially watch the market heat up for VF's and XF's that have the Gem Unc. appearance, more affordable also (but even these are getting tough and expensive) enables one to complete sets or fill a majority of the major type sets! In the next 12 months I really think if you don't have what your looking for as a collector you'll be waiting many years to procure it. You have to: HUNT, FIGHT, BARGAIN, NEGOTIATE & be willing to pay to get it!

VERY IMPORTANT!

**All Pricing Spreadsheets are
reflective of C.G.C.
Product only!**

These prices are the result of prices realized from sales of **C.G.C.** product, **NOT** raw notes and **NOT** notes in other slabbed holders!

You can NOT compare (realistically) C.G.C. prices realized with other notes (raw or graded by other companies) with similar expectations.

Recent EXAMPLES:

CGC –65 Bison sold for **\$5.5k**, competitors 65 offered at **\$3.3k**
CGC –66 Bison sold for **\$12.5k**, competitors 65 offered at **\$6.5k**
CGC – 65 \$1 Ed (fr.224) sold for **\$3.5k**, competitors 65 sold **\$2.2k**
CGC – 65 Chief (same fr.#) sold **\$4.3k**, competitors 65 sold **\$1.8k**
CGC – 65 \$500 '34a sold **\$4.2k**, competitors 65 sold for **\$2.4k**
CGC – 65 \$1,000 '34a sold for **\$9.5k** (ebay) competitors 65 **\$3.5k**

CGC – 65 \$10 '28 Gold sold **\$1.9k**, competitors 65 sold for **\$1k**

(*examples go on endlessly, the point is not all grading services realize equal values (as in the coin industry), and figures should not used for raw or other slabbed product).
