"Get your Checkbooks Out!"

The Claim Jumpers are coming!

By Joseph M. Bissell

Krause publications is slated to release the 4th Edition of the "Standard Guide to Small Size U.S. Paper Money" book in November/December. Hang onto your notes & cash because this edition (latest release in the last three years) is going to reflect two substantial factors. First, obviously the prices have soared dramatically in the last three years. Secondly, for the first time the book will list prices all the way up to Gem; whereas historically it only went up to CU. The Claim Jumpers I'm humorously describing here are the dealers/collectors that have been panning for gold, your gold, gold notes, that is. Dealers and collectors alike have witnessed surges in the Small Size paper money market, especially in the last 12 to 18 months. As an example, I was fortunate enough to procure a note of great paucity, the 1928 E \$1 Silver Certificate. This note (known as the Funnyback) runs from the 1928 plain to the 1928 E, the "E" is certainly the rarest, with the "C" hot on its heels and the "D" not far behind its predecessor. You certainly don't see many Gem "E's" and this note attained a MS 67 (one of two that I

True Rarities!

Do you know where they are?

By Robert J. Kravitz

When you compare rarity, difficulty of buying a note, and price, it becomes quite clear that Fractional currency is a great value. This is especially true when comparing it to other currency's. The evidence of this has caused a surge of new collectors, more than I've ever seen in 30 years. Most of the older collections have been sold. Even new collectors are unwilling to sell, pointedly refusing to even discuss selling their notes for many years to come. Therefore, increasing the difficulty of procuring fractionals in high grade or rarity. With very few new notes coming up for sale and the constant increasing number of new collectors; a real pressure cooker is brewing for the paucity of rare and high graded fractionals. With the diminished supply available and the ever increasing demand, prices have nowhere to go, but UP! To obtain a piece of fractional currency (even the more commons) it Gem is quite a challenge. To me personally a Gem is: almost a perfect note, better than average margins and centering (on both sides) for that type of note. For example: due to the sheet layout, most Justice notes are very close on the margins. So this particular note would certainly need better than average tight margins to attain Gem status. A Gem note should not be toned and of course shouldn't have any pinholes. The Fr.#1381 50 cent 5th issue (Crawford note) is common, but definitely not in Gem! Last year it took me six months to find one to complete a 23 piece type set. The Fr.#1357 50 cent Fiber paper, Auto. Sig. Justice note is a very scarce note. This may come up for sale in Choice only one or two times a year, there are only 20 unc's. known and only ONE in gem! So if your putting a Gem 46 piece

Joe Bissell (Emails to: sales@gradedcurrency.com)

know of. A collector had contacted me just hours before I obtained this note and had told me he found the other one and that I needed to talk to his wife at his funeral if I wanted it. I pleasingly informed him that I also found one, the other one in 67, of which I owned for about an hour. In my excitement of finding the note, I shared an email with a colleague who struck with the accuracy and venom of a king cobra. Within minutes the note was gone, probably never to return to my basket. My point is, there are many different rarities (by grade or fr.#) in Small Size Notes, and collectors have always searched them out, but now a whole new audience is looking for them, an audience that isn't shy about paying the newly established prices. The areas that I've noticed most in desirability and ever increasing prices are the: North African set (\$1,\$5 & \$10), the Hawaiian set (\$1, \$5, \$10 & \$20), the Funnyback set (1928 thru 1928E), the Small size Gold Cert's (\$1, \$10, \$20, \$50, \$100, \$500 & \$1,000), the Red Seal Legal tenders (especially the \$1 fr.1500), which I've seen go for well over \$1,000 in MS 67. The High Denominations have always been hot, and today's market is NO exception. I recently sold a \$500 1934G in MS 65 on ebay, which brought \$2,125. The buyer then purchased my only \$1,000 in 65, of course at which time I received two more buyers that wanted a \$1,000 in 65. I called around and found a dealer who had one (finally) and he wanted \$450 more than I just sold mine for. The small size Nationals have a following of collectors who are filled with tenacity towards completing a set – one from every state (which is possible) in Gem. Well, watch out for those Claim Jumpers looking to pan for gold in your backyard!

type set together, you'll have to settle on a Choice CU for the hole. This obviously makes this note scarce even in Choice and very Rare indeed in Gem. Many of the rare fractional currency notes are already in tight collections and will not be sold for many years to come. The Fr.#1296 25 cent (3rd Issue) for example has only 12 known period! I know where may be 9 or 10 of the dozen are and these guys will not sell, zero discussion on the subject. This leaves maybe 2 that might make it to market. The last one sold in Gem condition at \$4,200. Comparitively, if this were a Large piece of currency it would of sold for probably over \$100,000 or more. In fractionals, there are about 15 different notes that contain 25 or less "known" of each, and they are all still very undervalued-but not for long. Another very undervalued type of note are the fiber paper notes and the auto. Sig. Notes. However, new collector awareness in this area is also taking its toll. Take a minute out and look below at the astonishing low print runs of some of these notes: The Grant-Sherman specimen notes total for all types (signed or printed) were only 9,016 (as of 1884), with only 3,813 still outstanding. How many of these can really be left? The Fr.#1273 Grant-Sherman (only in Narrow Margin), which are predominantly known to be on the very rare Pink & Green shields. May be 70 known, of that 20 to 30 are on shields and still have shield remnants of on the back of the note. Of the above, may be only 5 or so are in CHCU-Gem with no remnants, probably only 1 or 2 in Gem. Also here's a low run Fr.#1235 5 cent(2ndIssue)fiber paper only 11,587 printed. To learn more about Fractionals Order Rob's Free Catalog (see back pg. Ad)

"PRICING, GRADING & POPULATION SUMMARY"

This is a "Retail Publication," and is designed to reflect current market prices. These **prices** are procured from many sources, including: Dealers, Internet auctions, previous auction houses "prices realized," striving to reflect current market prices. If the Note Type contains a range of Fr.#'s, then the listed price reflects the most common Fr.#. This publication is in NO way instructing or suggesting for its readers to purchase at these levels. **Grading** ranges from Very Good (MS 8) to Premium Gem (MS 68). The listed prices were gathered from both professionally graded and independently graded "sold" notes. We did denote the observation that prof. graded notes generally sold for higher prices than independently graded notes. A **Population Summary** column is listed for ea. Note Type, many times with a range of Fr.#'s. Example: Fr.#100-102 (1880 \$10 Legal Tender) shows 24-6-38 in the Population column-meaning there are 24 notes in CU & up for Fr.#100, 6 notes (in CU & up) for Fr#101 & 38 notes (in CU & up) for Fr.#102. If you see +++ there are likely more out there than reported.

VERY IMPORTANT!

**All Pricing Spreadsheets are
reflective of C.G.C.
Product only!**

These prices are the result of prices realized from sales of C.G.C. product, **NOT raw notes and NOT notes in other slabbed holders!**

You can NOT compare (realistically) C.G.C. prices realized with other notes (raw or graded by other companies) with similar expectations.

Recent EXAMPLES:

CGC –65 Bison sold for \$5.5k, competitors 65 offered at \$3.3k
CGC –66 Bison sold for \$12.5k, competitors 65 offered at \$6.5k
CGC – 65 \$1 Ed (fr.224) sold for \$3.5k, competitors 65 sold \$2.2k
CGC – 65 Chief (same fr.#) sold \$4.3k, competitors 65 sold \$1.8k
CGC – 65 \$500 '34a sold \$4.2k, competitors 65 sold for \$2.4k
CGC – 65 \$1,000 '34a sold for \$9.5k (ebay) competitors 65 \$3.5k
CGC – 65 1168 \$10 GC sold \$3.5k, competitors 65 sold for \$1.8k
CGC – 65 \$10 '28 Gold sold \$1.9k, competitors 65 sold for \$1k

(*examples go on endlessly, the point is not all grading services realize equal values (as in the coin industry), and figures should not be used for raw or other slabbed product).

Let's Talk

Dealer Discussions

I enjoyed (as I always do) a conversation with Allen Mincho the other day and he expressed a thought that I think articulated what a lot of dealers/collectors believe. Allen said, "as the population of graded (recorded) notes grow to higher levels people will feel more comfortable with what's out there." Certainly with this higher comfort level higher prices will be right behind. The numbers are certainly growing of recorded notes and the fearful perils of the unknown are diminishing, and prices are rising. Interesting statistic, in the ANA show (by Heritage in Aug.), there were 63 graded lots/notes offered of which 63% sold. There were 14+ notes graded in MS 66, and they realized **1.52 times Bid wholesale**. I'd call this an established price bar, reflecting that third party graded notes in Superb Gem most definitely realizes more than a raw note denoted of equal grade. I believe as in coins, this trend will continue, time & prices realized will most certainly be our gauge. Dealers are watching anxiously at how much they may be leaving on the table by not getting their notes graded, but many dealers (who have notoriously sworn off grading) are now submitting into the new era and grading their entire collections. People want security and obviously they'll pay for it. As Allen said, "if dealers do keep seeing graded material consistently realize higher prices (of 20% or so) over raw material, people will only leave money on the table for so long.

"How Rare is Rare – Really?"

I recently (in August) attended the Lyn Knight Show in Dallas and witnessed something that has exemplified my curiosity on dealers/collectors buying attitudes. There was a gorgeous note for sale (Lot #1157) a Fr.# 741 1918 \$1 Federal Reserve Bank Note drawn off of Dallas. The note was listed as Gem Cu (raw). Now through my research, I'd certainly put this note in the Rare category, there's only ONE recorded in Unc., with less than two dozen total even known. Here's where my curiosity goes to light speed (by the way, if you traveled at the speed of light you'd circle the earth 9 times in one second. Yes, this is interesting!), this Note type has two other Fr.#'s in it. The Fr.#740, which has about 41 Unc.s and Fr.#742 with 11 in Unc. Now, I wouldn't call 41 Unc's a plethora, but, its not just one either. So the million dollar question is, how valuable is a note if it's the only one known in Unc. but there's other Fr. Numbers in that type's range that are very common. If most collectors are trying to complete a type set or procure one note off of each district (which I think is the most common stance), then there's probably only a few gentlemen striving to collect the high rarities by Fr.#. Well, as you all know, these notes in just Gem off of common cities or fr.#'s sell for around \$500 to \$700. Well, I saw this note go to a specific dealer (who's very astute) pay \$2,000 plus the juice. This obviously tells us all, there are very high prices to be paid for high Fr. Rarities. Also, I believe we will continue to see strong prices realized for high graded notes, which will probably be reinforced by the sale of a \$2 Rainbow in MS 68 in the Cincinnati Show by CAA the 21st of Sept. (shortly after this article). As you probably remember in last months issue, a high graded note sold for 12 times wholesale prices. One thing is for sure, we're are all entering a new frontier of prices!

"What Interests You?"

This publication is here for you – the subscribers. After the first publication I received several e-mails requesting that the print size of the prices be enlarged. The printers said it couldn't be done, but we did it! We strive to print the absolute cutting edge of your interests and up to the minute changes within our industry. Please feel free to speak up and express your thoughts, philosophies, and your interests. You can contact us by emailing us at: sales@gradedcurrency.com and we're looking forward to meeting with you. Thanks, Joe.
